About TP01 IPR

Introduction to Programming Enviroment is a subject that helps students to build a professional enviroment for coding and understanding some technical words used in everyday project development . We believe development must be an enjoyable and creative experience to be truly fulfilling. IPE takes the pain out of development by easing common tasks used in many projects, such as:

- code sharing for group project development
- code version for keeping changes under control
- code ownership by identifying who make any part of the code
- task management for dividing tasks for each team member.

Code of Conduct

In order to ensure that eveyone understand the subject, make sure everyone complete every 'Task Practice'.

License

The IPE TP01 is open-sources software licensed under the [MIT license](#)

Example code

Java code example:

```
public class app{
    public static void main(String[] args){
        System.out.println("Welcome to IPE TP01. ");
    }
}
```
